

ACB Inc

Dear Scientist:

Our company, ACB Incorporated, has bought a large number of tobacco stocks. As a result, our company will make money if tobacco companies do well. However, if tobacco companies fail to make profits, we will lose out as well.

Recently, it has come to our attention that nicotine is entering a river near one of the cigarette manufacturing plants. If the nicotine is dangerous to plant and/or animal life in or near the river, the tobacco company might be sued. A lawsuit would be very expensive and could cause the profits of the tobacco company to drop.

We need to know if nicotine is dangerous to plant or animal life.

We would like to hire you to conduct an experiment to discover whether nicotine is dangerous. We need the results of your experiment as soon as possible.

Thank you for your assistance.

Sincerely,

Joe Dawson,
Executive Director
